

Prevent odour & increase efficiency of waste systems!

BioAg DFD™ is a naturally fermented microbial culture containing a rich food source of vitamins, minerals, proteins, enzymes, amino acids and carbohydrates to stimulate digestion of organic waste.

It contains all natural ingredients making it safe and non toxic to use around humans and animals.

Features and Benefits of using DFD are:-

- Mitigates odours.
- Digests suspended solids thereby increasing liquid to solid ratio (e.g. in septic tank scenario will result in emptying less).
- Reduces potential for pathogens.
- Reduces waste residues for ease of cleaning.
- Reduces biofilm build up in pipes and systems.

Domestic Uses

- Septic Tanks
- Waste drains
- Long Drops!
- Caravan toilets and Portaloo's
- Compost Activator & Accelerator
- Grey Water Systems
- Wheelie bins, skips

Kennels and Catteries
